

# WaveTunnel Installation Guide

Q4 2021

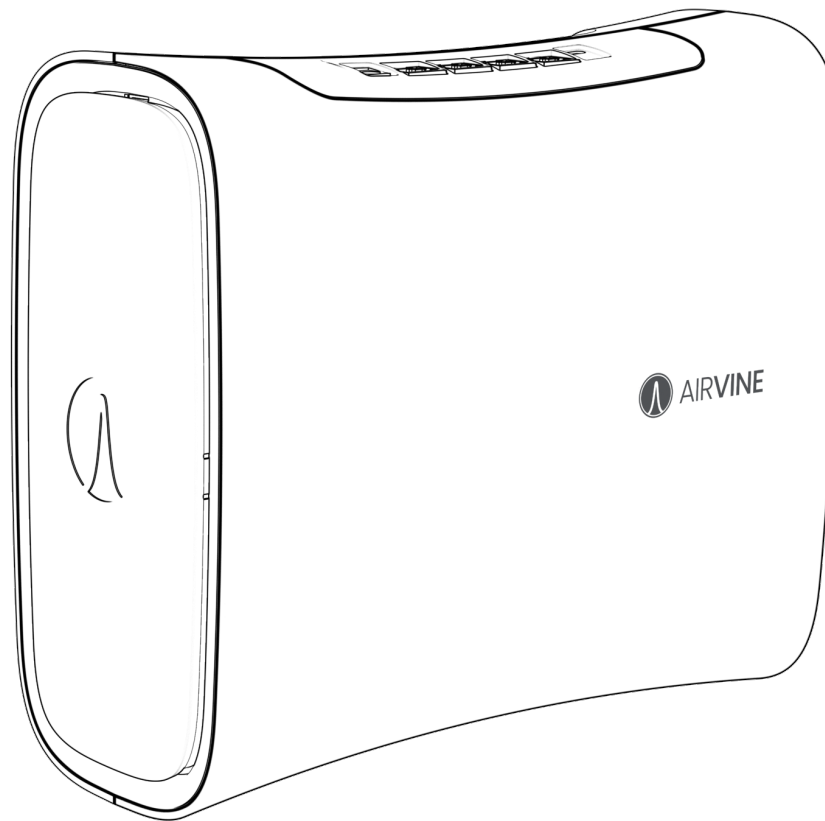

AIRVINE

# What's Included

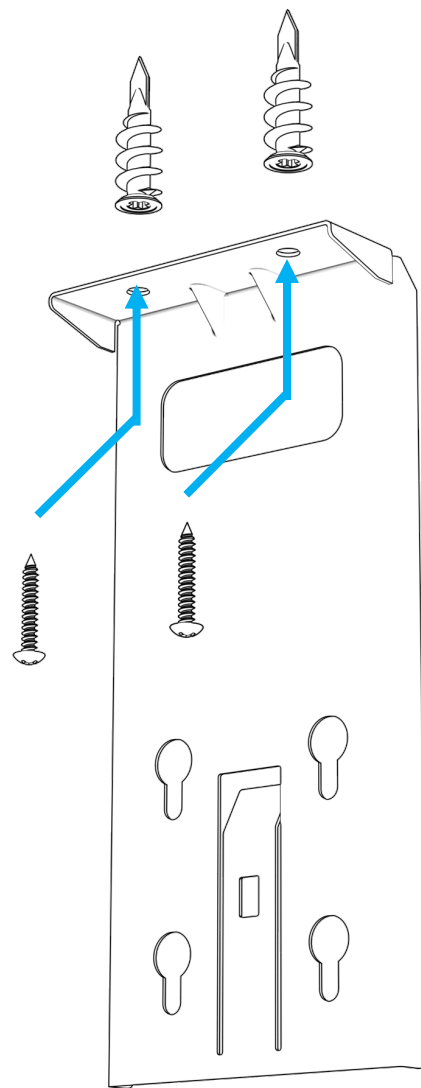

Ceiling Mounting  
Bracket

WaveTunnel (WT)  
Unit

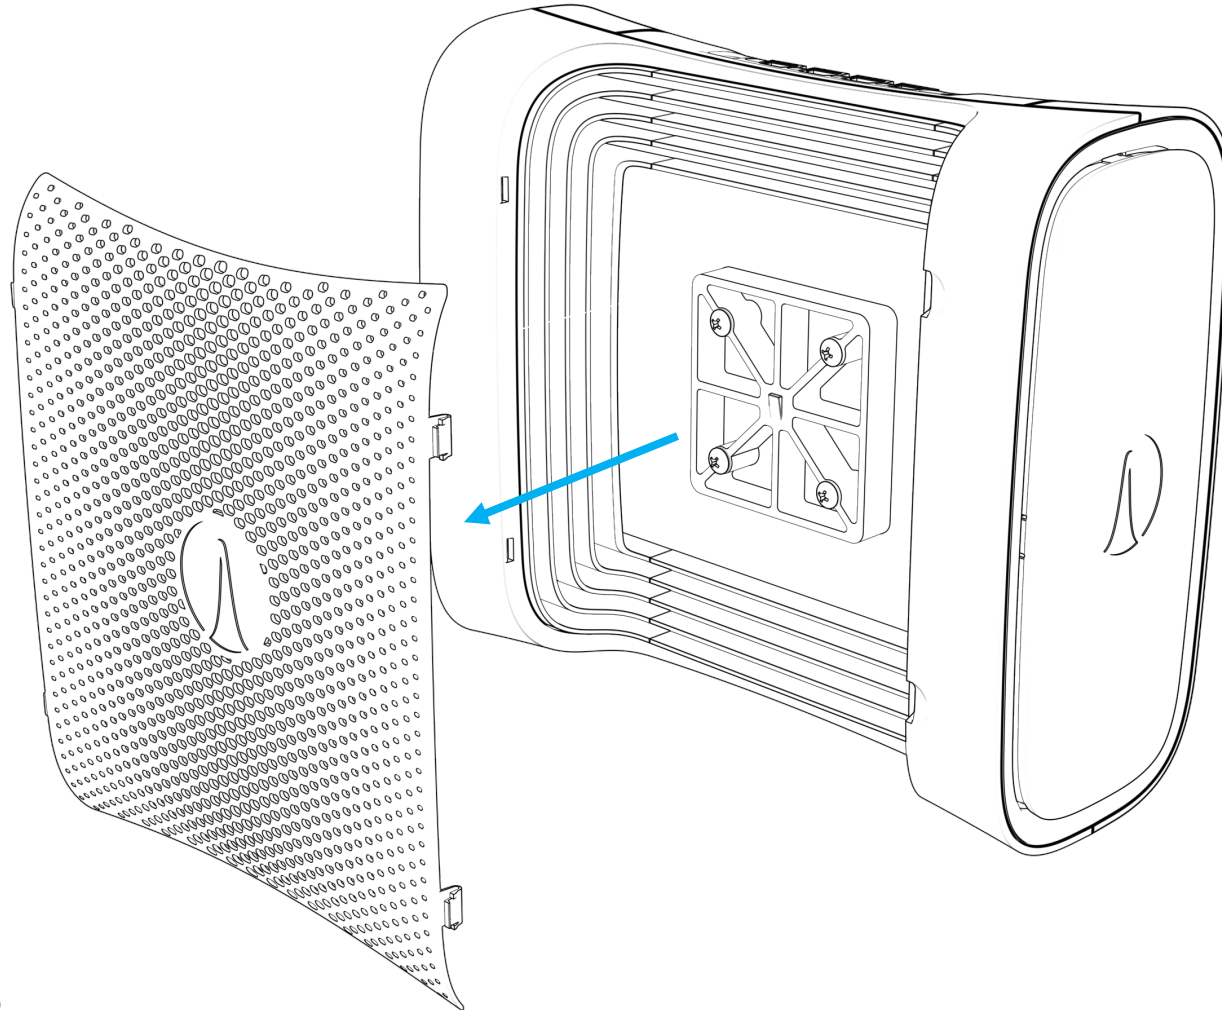

# Attaching the Bracket to the Ceiling

- Screw the bracket into the ceiling before attaching it to the WaveTunnel™ unit
- Mounting hardware will depend on the type of building material
- Options include acoustic (aka drop), sheetrock, concrete, wood, etc.
- Once the bracket is in place the WaveTunnel unit can be attached
- Make sure the bracket is pointed in the desired direction
- Note: Each WaveTunnel unit weighs 5.3 pounds

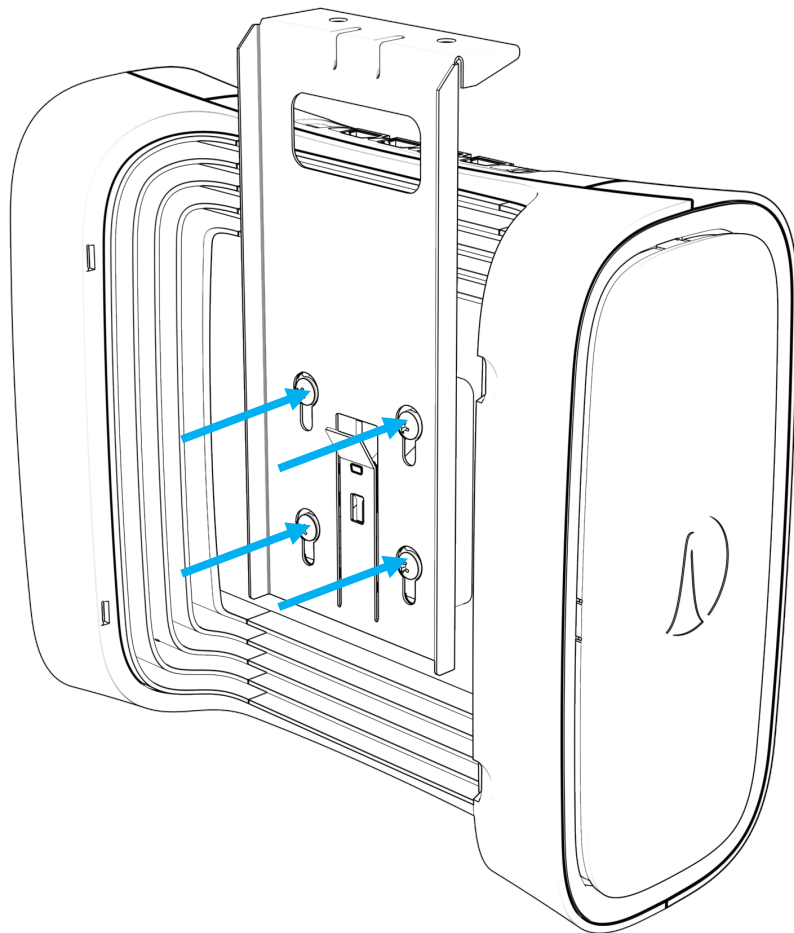

# Remove the Rear Cover

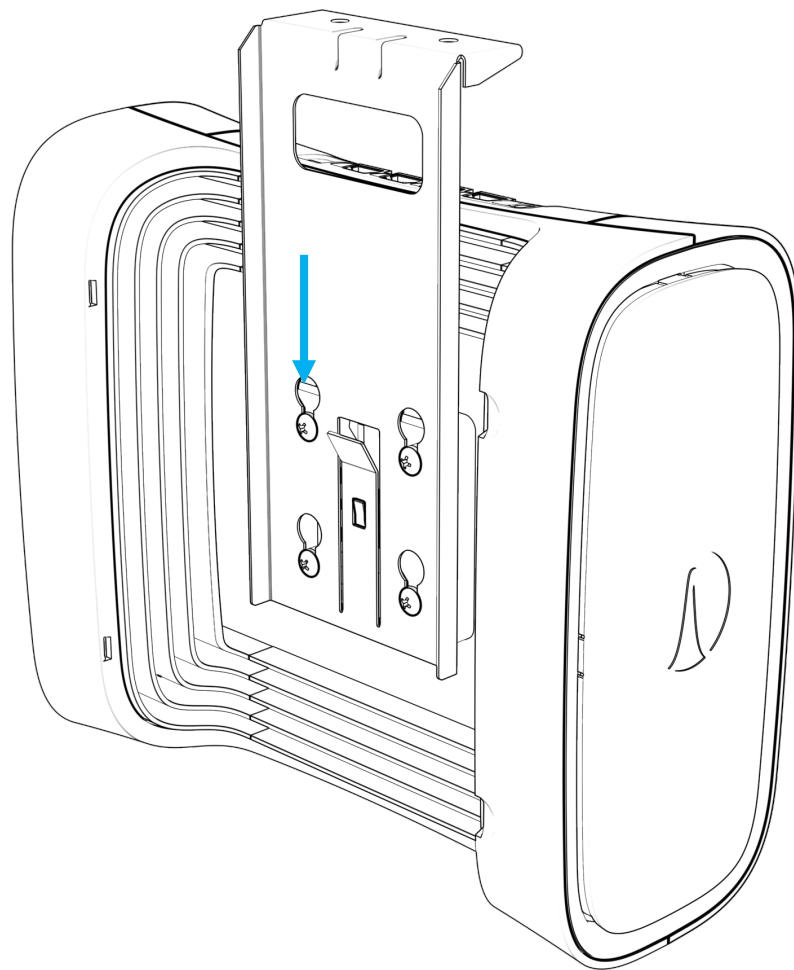

# Attach the WT Unit to the Bracket

The WaveTunnel unit is positioned with the screw heads lined up with the keyhole features in the mounting bracket.

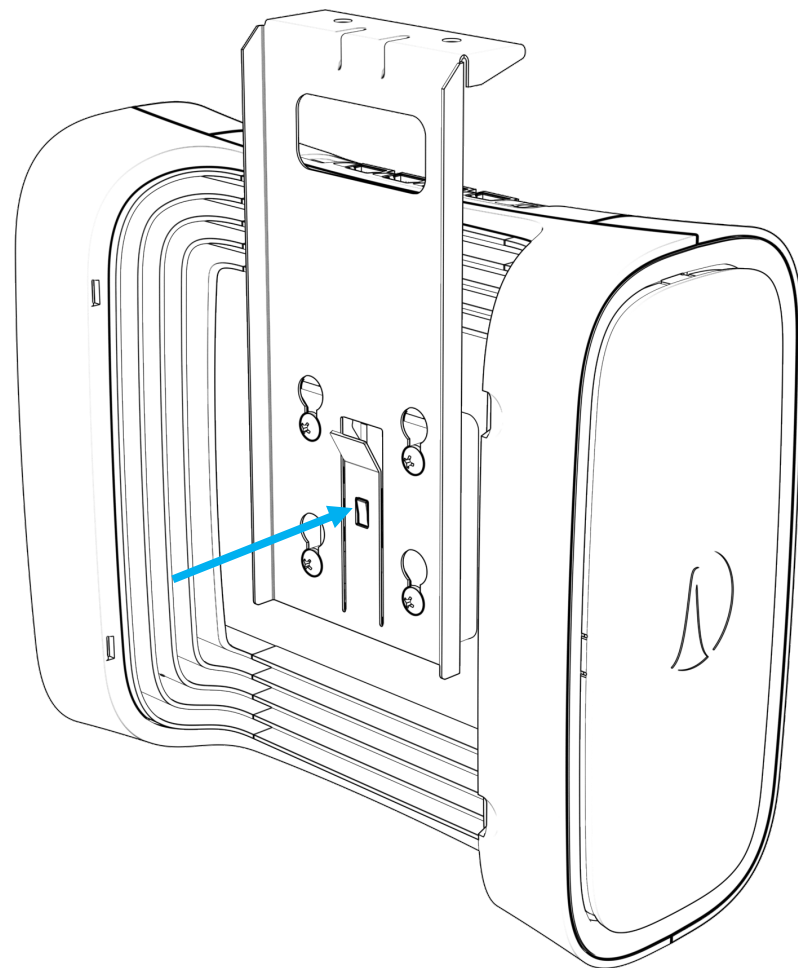

# Attach the WT Unit to the Bracket

The WaveTunnel unit slides downward to engage the screw heads into the mounting bracket.

# Attach the WT Unit to the Bracket

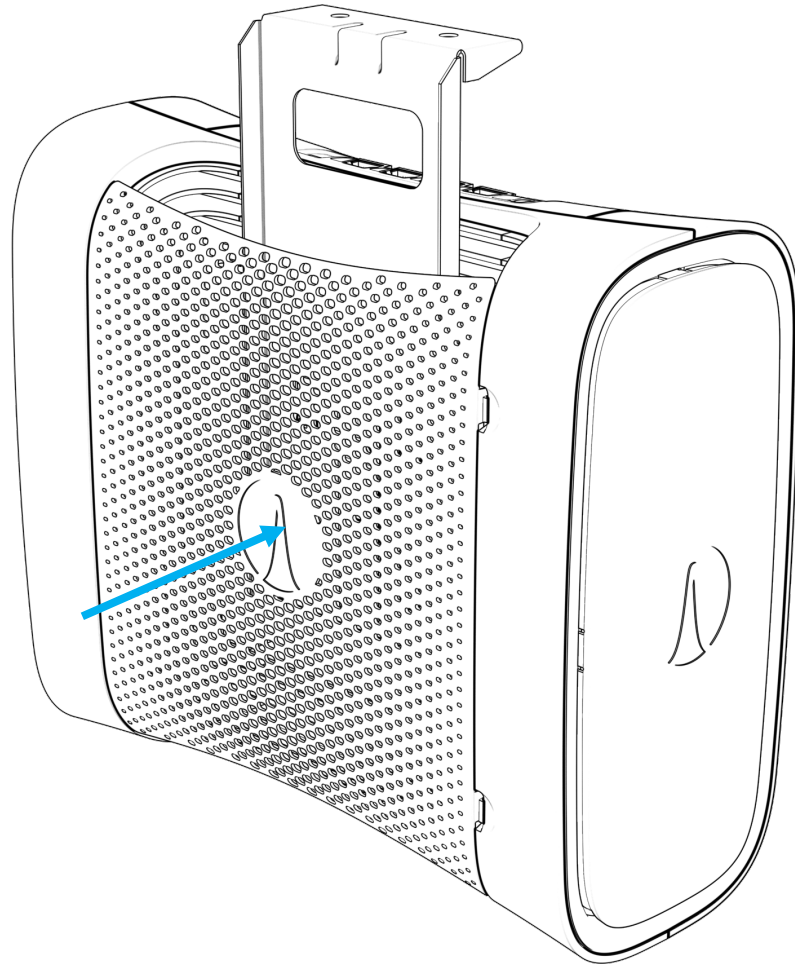

Once the screw heads have slid all the way down, the locking mechanism will engage and prevent the unit from inadvertently being bumped off the mounting bracket.

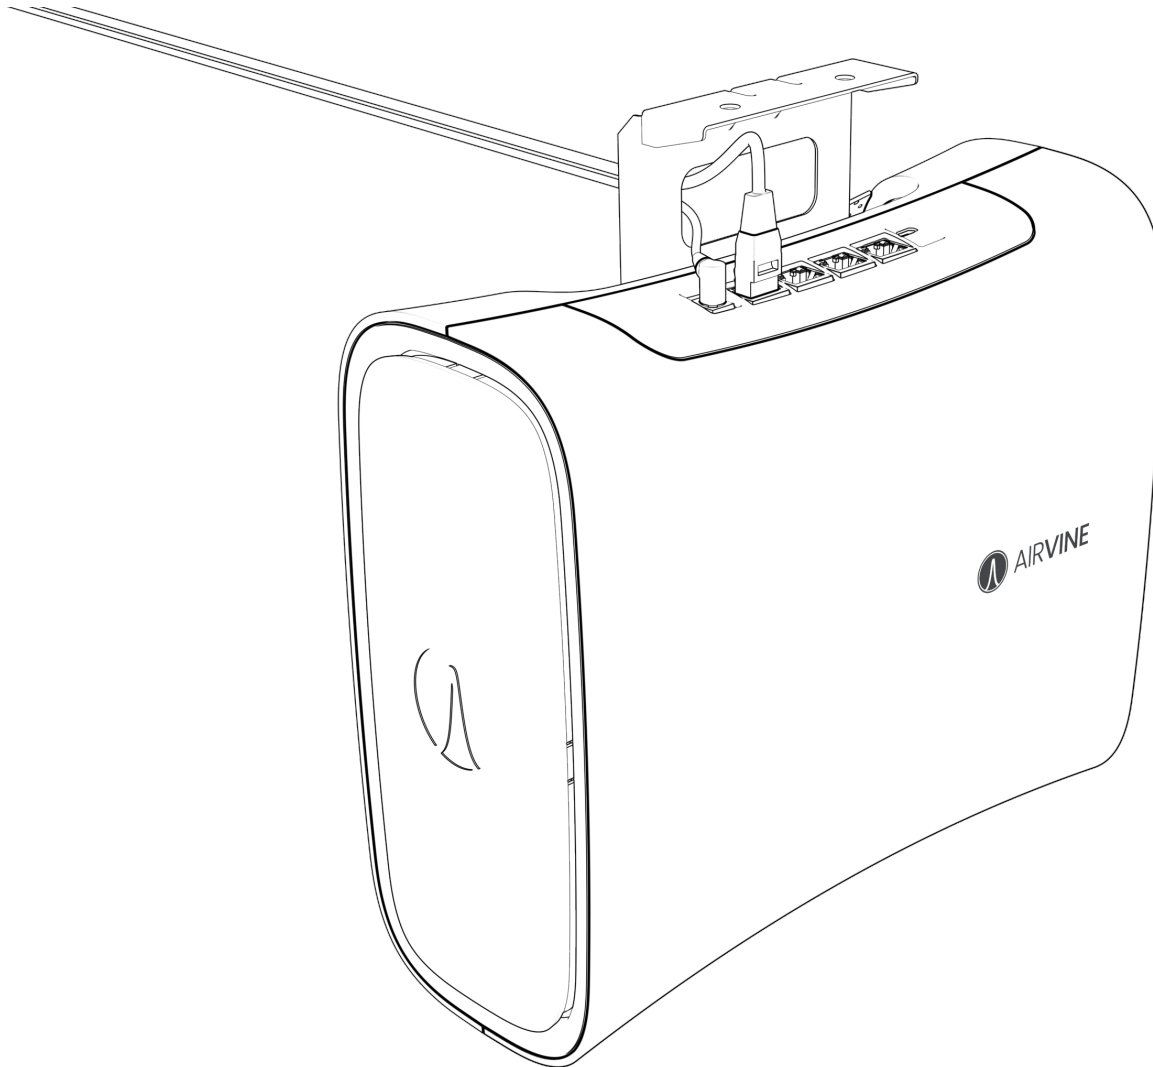

# Reattach the Rear Cover

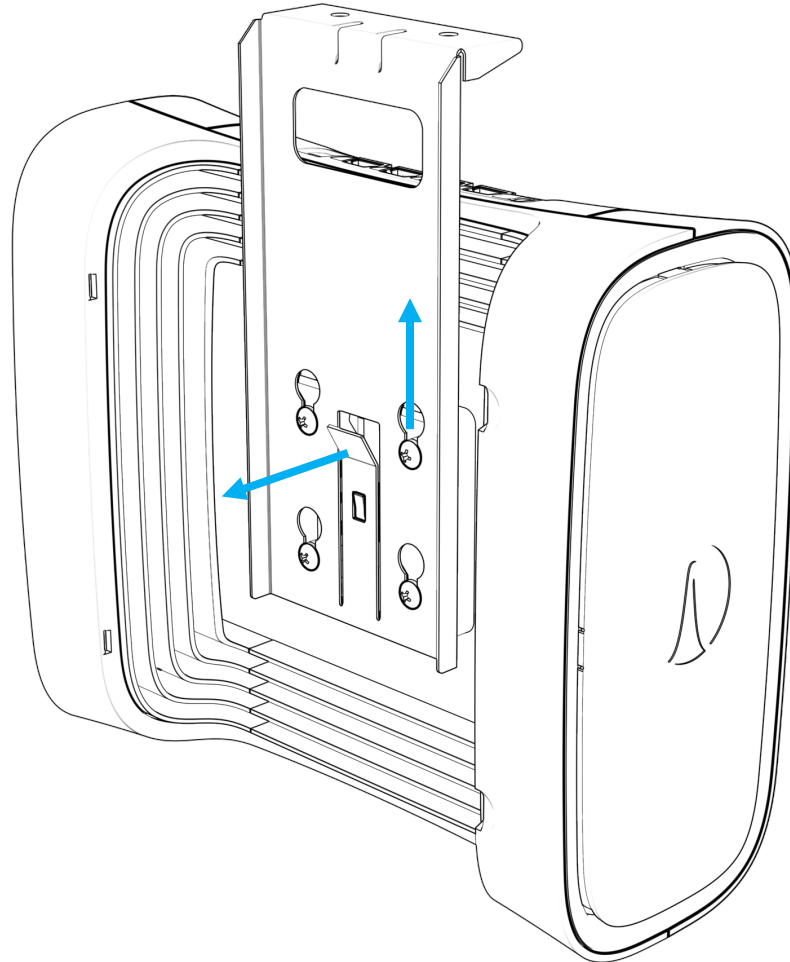

# Attach Power and Ethernet Cables

- Once mounted, connect the power and Ethernet cables to the WaveTunnel unit
- We are now ready to configure each unit (see configuration guide)

# To Remove the WT Unit from the Bracket

To remove the WaveTunnel unit from the mounting bracket, simply release the locking lever and slide the unit upwards.
